DAY 6 - DEPLOYMENT PREPARATION AND STAGING ENVIRONMENT SETUP

focuses on preparing your marketplace for deployment by setting up a staging environment, configuring hosting platforms, and ensuring readiness for a customer facing application. Building on the testing and optimization work from Day 5, this stage emphasizes ensuring the marketplace operates seamlessly in a production-like environment. Students will also learn about industry-standard practices for managing diﬀerent environments like non-production (TRN, DEV, SIT) and production (UAT, PROD, DR).
